

Environmental Chemistry

Environmental Scientifics Group's Laboratories and Analytical Services Division provide a comprehensive testing service to the environmental industry, specialising in the analysis of soils, waters, leachates, effluents, industrial wastes, marine waters and sediments accredited by UKAS to ISO17025 and MCERTS standards.

Operating from state-of-the-art laboratories, ESG are dedicated to delivering the highest quality service in the sector.

Services include:

-  MCERTS Soil Analysis
-  Petroleum Hydrocarbon Analysis including TPH_CWG
-  Waste acceptance criteria
-  Polycyclic Aromatic Hydrocarbons
-  Pesticides and Herbicides
-  Polychlorinated Biphenyls
-  Metals
-  Anions
-  Sample preservation

Environmental Chemistry

ESG are passionate about providing a high quality, reliable and flexible service to suit your budget.

ESG's Laboratories and Analytical Services Division is committed to an on-going continuous improvement programme, focused on developing its coverage of accredited analysis and improving the interface between the client and the laboratory.

With a highly experienced and qualified Project Management team, ESG are able to offer an unrivalled customer service experience, providing clients with single points of contact within the laboratory. Bespoke reporting packages are available on a client or project basis. ESG have significant experience in producing analytical reports in a variety of formats including AGS and Equis in addition to our standard reporting formats.

Building upon its core skills in the generation of robust, high volume analytical measurements to strict standards and deadlines, ESG has become the laboratory of choice for all organisations seeking robust environmental data supplied to a defined programme.

Laboratory Facilities

Operating from state-of-the-art laboratories holding fully comprehensive UKAS and MCERTS accreditation, ESG are able to meet the exacting standards that clients require.

Analytical Methods

All methods used are fully documented in-house techniques developed from published standard procedures. Our flexible, client focused systems of operation mean that we can tailor our offering to meet requirements on a client or project specific basis.

Expertise

ESG's comprehensive range of services offers clients a complete solution including collection of samples from sites/offices, analysis, electronic delivery of results in a variety of formats and advice or guidance on the results produced if required.

Quality Assurance and Control

Tailored systems and procedures have been installed to control quality at every stage of operation. Through participation in a number of quality assurance schemes including CONTEST and AQUACHECK we are able to demonstrate confidence in the results that our clients rely upon.
